# INTRODUCTORY

IN THE fields of Designing, Furniture Building, Architecture and the Allied Arts and Trades, there is no name better known than that of **Syroco** Products. The introduction of **Syroco** Fibre Wood Carvings and Mouldings a number of years ago immediately supplanted the old time laborious and expensive method of producing Carvings by hand. To meet the requirements of the industries we serve, we have constantly developed new styles, designs and valuable features in the field of ornamentation. Today we offer a line so extensive and varied and a product of such merit that we are gratified in knowing that **Syroco** Carvings and Mouldings are recognized as the important factor in the Furniture Trade, and more especially in the manufacture of Period Furniture.

A WOOD PRODUCT—**Syroco** Fibre Wood Carvings and Mouldings are a WOOD product, and, as such, should not be confused with composition or compo ornamentation. Every **Syroco** Carving and Moulding is an absolute reproduction of a hand carved model to the minutest detail of tool cuts and wood grain. Our models are prepared by designers and carvers of rare ability, resulting in a finished product which bespeaks the work of artists.

FINISHING AND APPLYING—For finishing qualities **Syroco** Fibre Wood Carvings and Mouldings are on a par with the finest grades of woods. Being absorbent and having all the other wood properties, they will take stain and filler and will finish as perfectly as the cabinet work. For application, previous to the process of finishing, we recommend the use of a good quality cabinet glue and additional reinforcement with brads if necessary.

**Syroco** PRODUCTS INDISPENSABLE—We cannot too strongly emphasize the features and qualities that have made **Syroco** Fibre Wood Carvings and Mouldings indispensable to the many users:
